

By switching to  
**green energy**

*Manchester Landmark Investment Ltd*

**is helping to build  
a green Britain.**

Energy is one of the biggest single sources of carbon emissions in Britain, so companies can make a huge difference just by switching to a green supplier.

And by joining Ecotricity, you make an even bigger difference – that's because we harness your bills to build new sources of green energy in Britain. So you're changing the way energy is made and used – just by paying your bills.

Thanks for joining the green revolution!

Dale Vince - Founder, Ecotricity

# Green Gas Certificate

Certificate Issued to:

## MANCHESTER LANDMARK INVESTMENT LTD

*St Peters Square, 1 Oxford Street, Manchester, M1 4PB*

This certificate created by Crown Gas & Power (a licensed green gas provider) confirms that **Manchester Landmark Investment Ltd** is purchasing green gas (biomethane) at these premises during the supply period –

**26<sup>th</sup> December 2020 – 30<sup>th</sup> September 2022**

Green Gas is made from renewable materials and therefore creates very low carbon emissions. These renewable materials are already present without our environment and therefore it does not disturb the carbon balance, whereas the burning of fossil fuels such as natural gas releases carbon that has been stored for millions of years.

Dale Marriott  
Director  
Crown Gas and Power
